

**APPROPRIATE PLACEMENT OF STUDENTS**

Grouping of students will be flexible and efforts will be made to deemphasize any labeling of groups; grouping arrangements will meet students' changing needs and achievements. After consideration of all information available, which may include secondary student or parental input, determination of the placement of any student is the ultimate responsibility of the principal, except when the Board of Education approves and arranges for placement following a recommendation by the Committee of Special Education, in accordance with law.
